<p align="center"><b>Module 1- Writing Section</b></p> <p>Academic writing module: Responses to the academic writing module are short essays or general reports, addressed to an educated non-specialist audience. There are two compulsory tasks. Task 1 requires 150 words, and looking at a diagram, table, or data and to present the information in their own words. Task 2 requires at least 250 words, students to be presented with a point of view, argument, or problem and asked to provide general factual information, present a solution, justify an opinion, evaluate ideas and evidence, etc.</p> <p>It includes two tasks wherein the topics are of general interest and relatable for candidates applying for an undergraduate or postgraduate program. For your first task, you will be handed a paper that would contain either a diagram, table, or graph. You will be required to recapitulate and define the given data in your own words. You may be asked to explain a certain data entry, process the given information, or a flowchart to logically arrive at a conclusion. In the next task, you need to write an essay as a response to your deduction from the given data and support your argument with relevant examples, through the given data. Please note that the writing style should be strictly formal.</p>	3/L3
<p align="center"><b>Module 2- Reading Section</b></p> <p>This includes three long paragraphs which can be either descriptive, factual or analytical. These paragraphs are basically excerpts taken from newspapers, research works, journals, books, or even magazines.</p>	3/L3

You will be given a minute or two to familiarize yourself with the topic as you would need to speak on that topic for about two minutes. Post your speech</p> <p><b>Part 3 discussions (5–6 minutes)</b> Deeper questions and abstract discussions would take place based on the given topic and your speech. You will get the opportunity to explore your given topic and delve into deeper issues.</p>	<b>3/L3</b>
