EVENTS OF THE MONTH

1. INSPIRE SERIES TALK-01
2. INSPIRE SERIES TALK-02
3. VISUAL INTELLIGENCE & DEEP LEARNING
4. MAITRI
5. PORTFOLIO CREATION
6. CSS & BOX MODEL INTRO SESSION
7. CHATBOT
8. PLACEMENT ACTIVITY

Inspire Series Talk-01

Global Academy Of Technology
Department of Artificial Intelligence and Machine Learning

presents

"Inspire Series-Talk 1"
Rural to Corporate...Early preparation strategies for placements.

 Deepak Ashok
Full Stack Developer,
COGNIZANT

Date: 01-02-2023
Timing: 10:00 am

Dr Preeti Satish
HOD, Department of AIMP, GAT

Dr Ranapratap Reddy
Principal, GAT

A talk that inspires people's aspiration and leads them forward towards it is called as Inspire talk . It was a great pleasure to have Mr. Deepak Ashok who's life was a great example to every young minds to get on with their goals . He taught us on how to be smart in this corporate world. He gave his life experience about the process every engineering student goes through. He filled in confidence and made us realize that nothing is impossible. There is no barrier that can stop a person in reaching his aim . He introduced new platforms to improve in coding. He gave us a path in which hard work and smart work was going hand in hand to reach goal. On the whole , it was an inspiring talk.

Inspire Series Talk-02

GLOBAL ACADEMY OF TECHNOLOGY
Department of Artificial Intelligence and Machine Learning

Organizes

"EXPERT TALK"

Reuben George Mathew
Analyst, Goldman Sachs,
SIH 2020 Software Edition
Winner
Bengaluru, Karnataka, India

SATURDAY
FEBRUARY 11, 2022

Dr Preeti Satish
HOD, GAT

Dr N Ranapratap Reddy
PRINCIPAL, GAT

The second series was about building in new ideas on how to create , manage and present the projects. It was a session which gave a immense knowledge on how to create projects , on how to pitch in ideas. The expertie himself is an analyst at Goldman Sachs , he was an inspiration to all the young minds. The session gave importance of projects and thier improvisation using different web tools . The session also spoke about hackathons , how important and efficient it is to participate in it. He also gave his experience when he had competed in hackathons. It was an amazing talk which showed lights on new paths and new ideas to follow. There were many takeaways from this session , creativity , continuity , focus and many more. The session made every individual to think on to something and gave a good start to all pf the projects. It set a great example in everyone's minds which can be followed while working on any tools or platforms or any projects. On a jest , the talk really made a great impact on everyone.

VISUAL INTELLIGENCE & DEEP LEARNING

CHAT BOT

The talk regarding visual intelligence, the ability to perceive, analyze, and comprehend visual information and the research challenges and applications of it was conducted. The seminar was conducted by the source persons from Excellence in Visual Intelligence (CEVI) KLE Technology University, Hubballi. It was not just confined to visual intelligence but, the talk started off with general knowledge regarding artificial intelligence and machine learning. The more they dug, the more they divulged their entire visual recognition and intelligence expertise. It provided a wealth of information. The session's main takeaways were the scope of machine learning, deep learning, and visual intelligence. Their accomplishments were inspiring. They provided a lot of exposure.

A session on developing our own chat bot, to allow humans to interact with digital devices as if they were communicating with a real person by simulating and processing human conversation (either written or spoken) was taken up by the AI&ML seniors. It was completely a hands-on session in which the seniors taught everyone how to create their own cake shop chatbot and link it to our Telegram account. They helped and guided us as we started working on our project. It was a very productive session. Everyone enthusiastically participated in the session, eager to learn something new and different.

SOCIFY

PORTFOLIO CREATION

The Social media club 'Socify' came up with the idea of a workshop on creating a LinkedIn portfolio. Portfolio creation is an important step in showcasing our skills, talents, and achievements to potential employers. For a portfolio to have an impact it requires careful consideration of the content, layout and presentation. a clear cut portfolio showcases ones actual personality. The team taught everyone basic steps in creation of LinkedIn posts by showing short videos and encouraging all to create a post of their own. By the end of the session every individual were able to create and post their achievements perfectly. Overall, the session was thoughtful and helpful to everyone.

WEBGETTER

CSS & BOX MODEL

'Webgetter' the web development club gave an introduction session on CSS and Box Model which are the essential concepts for web developers and designers to understand as they form the foundation of modern web design.

The CSS box model as a whole applies to block boxes and defines how the different parts of a box – margin, border, padding, and content – work together to create a box that you can see on a page. The session was about these two concepts and how they work together to create visually appealing and functional web page. It was an informative and amazing workdhop.

VIHANA MAITRI

"Alone we can do so little; together we can do so much". Following the words of Helen Keller, team Vihana organized "Maitri," a programme designed to teach kids life skills through engaging activities at "Ananda Marga orphanage". The team's thoughts was that there is nothing greater than love invested in helping to feed the impoverished living in hunger. The club leads engaged the younger crowd with various activities like small crafts using origami sheets and outdoor games like throwball. The kids had an amazing time learning and interacting with new people giving them a boost in confidence and basic interactive skills. The Vihana team distributed a meal as a way to make the children smile and had a meaningful lunch together. Overall the session was filled with values. The main goal of teaching the children about the importance of life skills and feeding them with food, hope and love was achieved.

"THE BEST WAY TO NOT FEEL HOPELESS IS TO GET UP AND DO SOMETHING. DON'T WAIT FOR GOOD THINGS TO HAPPEN TO YOU. IF YOU GO OUT AND MAKE SOME GOOD THINGS HAPPEN, YOU WILL FILL THE WORLD WITH HOPE, YOU WILL FILL YOURSELF WITH HOPE."
— BARACK OBAMA

PLACEMENT ACTIVITIES

The 1st Phase of Progressive Training Program was scheduled from 28th February 2023 to 3 March, 2023. The course offered to us was to help an individual develop basic soft skills needed in a cooperate world. The training instructor appointed, conducted various activities to achieve this goal. On the first day of training, the main focus was on personal core and enhancing one's leadership qualities and self confidence. Video based learning for these skill development was also provided. The second day was filled with enthusiasm as the class was divided into teams and each student worked hard to push their team forward. This helped everyone to have better cooperation and teamwork spirt. From building towers using paper to enacting mime shows every individual engaged themselves in all the activities.

The third day of training began with the same or even higher level of energy as many more fun based activities were conducted. The teams built their public speaking skills along with visual analysis and listening skills. Every individual thought about all the things that they were grateful for and made creative and beautiful gratitude boards. The last day of training was very informative as the activities were conducted in outdoors and great values were taught. At the end of the programme certificates were awarded to the students for completion of the course. From the start till the end the session was very much interesting, interactive, inspiring and fruitful.
